TELEPHONE: MONROE 6-0640

CHICAGO (22)

In reply to your request:

Here is our CLAMPS catalog that you asked for. This is the catalog used by our wholesale distributors in buying from us, and will enable you to determine quickly and easily just what you need. It is more complete on the subject of CLAMPS than any wholesalers' catalog is likely to be; if you have a tool dealer near you, show him this catalog and what there is in it that you want - and he should be able to supply you conveniently. If he cannot, or if he offers to substitute something else you will probably find it safer to order directly from us.

Note these two important facts: We have specialized in the manufacture of CLAMPS for nearly fifty years - and we spare no effort to see that each design is as nearly perfect as it can be. Notice the special "break-down" machine illustrated in the catalog - there is no guesswork about the strength of clamps pulled apart in this machine, nor how they compare with others!

With one or two exceptions, everything shown in our catalog is once again available for prompt shipment, whether the order comes from you or your dealer. Our increased facilities have made it possible for us to take care of the steadily growing demand for genuine JORGENSEN and PONY clamps without any sacrifice in the QUALITY of the materials and workmanship which is part of our product.

In that connection, you may be interested to know that all during the war years we never compromised on the QUALITY of our clamps - so that now you do not have to be careful of clamps of "substitute" quality if you insist upon the genuine JORGENSEN and PONY trade-mark on all the clamps you buy. Those trade-marks are your assurance of the best in CLAMPS.

An order blank is enclosed, together with a post-paid envelope for your convenience; orders are accepted only at the terms and conditions appearing on the price-list also enclosed.

Thanks for your inquiry - and for your care to insist upon JORGENSEN and PONY clamps at all times.

Very truly yours,

ADJUSTABLE CLAMP COMPANY

DVH/SE

What others say about "JORGENSEN" and "PONY" Clamps may be more important to you than anything we might say about them ourselves. Those who know and use many clamps already know just what our clamps will do and why they have gained their good reputation. We have made nothing but hand clamps for over thirty years. You may be interested in what others have written us about our products - we can quote from only a few letters:

From West Virginia (schools)

"We have over 300 of your clamps in our system here and have never known one of them to become faulty and they sure do get the hardest use of any tool in the shop."

From Edinburgh: (Organ-Builder)

"We purchased about six dozen of these ("Jorgensen") clamps in 1913; They have been in regular use ever since, and the only damage to date (July, 1923) is one screw broken by downright bad handling. We used to buy the old wood handscrews a gross at a time. They generally lasted about two or three years with sundry renewals. There have been no renewals or repairs of any kind to the "JORGENSEN" clamps since we bought them, and they have not been handled with any more reverence than the average workman handles shop tools."

From Philadelphia: (Tool Dealer)

"The American Car & Foundry Co. states that the 12" wood clamps (#2 "JORGENSEN") for which they have recently placed their order are used exclusively in steel plate work in their marking and punching department, and they find their entire satisfaction guaranteed. They also state that their workmen prefer this type of clamp to any other."

From Massachusetts (school)

"Some years ago we changed from the old type wood screw to "JORGENSEN". Our boys do better work, and fewer replacements are required. We have about ten dozen "JORGENSEN" in our shop."

From Oklahoma (individual)

"My 2 "PONY" clamps (fixtures) I got of you two years ago are A-1."

From Minnesota (machine shop)

"I am certainly very well pleased with the little "PONY" (C) Clamps, as they seem very strong and well made for such small clamps. I have used them already on a few welding jobs and think they will be quite useful to us. I have clamps of the same size in the shop already, of the "hardware" sort, but they do not at all compare with your "PONY" Clamps."

From British Columbia (sash and door plant)

"Some few years ago, we purchased two of the "PONY" Clamp Fixtures and they have given us remarkably good service. However, we forgot where they came from and had quite a job locating your advertisement."

"and we want you to know that your clamps are "the tops". We are not in the habit of passing out bouquets, but when they are justified, well---why not."

No names are given as these extracts are from letters not intended for publication. The originals are on file for inspection at our office (except the one from Edinburgh written to our British distributors). We have a great many others. We would appreciate your experiences or comments such as might be of interest in this connection.

From Minnesota: (school)

"The boys and the Man.Tr.Instructor are delighted with the ("Pony" Fixtures) clamps. Have not had a chance to make use of them myself, but they look good in every way."

From Wisconsin: (individual user)

"These Clamps ("PONY" Clamp Fixtures) work fine - much better than the other styles".

From Virginia: (school)

"We are in receipt of the two sets of PONY Clamps, and we are so well pleased with them that we are giving herewith an order for five more sets."

From Minnesota: (individual)

"I am using some of your "PONY" Clamps and I think they are a wonderful help to any man in a small shop for woodworkers."

From Honolulu: (individual)

"I recently received two "PONY" Steel Bar Clamps from you. I wish to let you know that they are probably the best bar clamps on the market for their price. Therefore I am sending in this order for more of your clamps."

From New York: (individual)

"I have used your "PONY" Clamps for several years in my home workshop. There is no other so satisfactory."

From Minnesota: (school)

"Your Representative.... called on me again to-day and brought to mind the very satisfactory experience we have had in trying out the "Holman" (now the "JORGENSEN") Steel Bar Clamp. We have not subjected this clamp to the most severe strains which it might be called upon to stand, but we have given it normal service and have found it to be satisfactory in every respect. It is quickly and easily adjusted, and holds securely."

From Texas (individual)

"Of course you know that no snap of to-day can function even inefficiently without "JORGENSEN" Handscrews, especially the adjustable kind. My little backyard shop has eleven now and is looking forward to the time when that many more may be financed. It seems I never have enough. They have plenty of intestinal fortitude..."

From Massachusetts (individual)

"The clamps are very satisfactory, the shipment was prompt, and I shall gladly recommend them to my friends whoever may need clamps."
